Our Business:

According to the Food and Agriculture Organization of the United Nations, Marine and inland fisheries is a source of income to around 820 million people around the world and increasing day by day. Due to geographical position and other resources, Bangladesh has become one of the world's top producers of farmed fish.

Fish and fisheries are an important part of Bangladesh's cultural heritage and economy. The sector is prominent in the country as it provides an essential source of earning foreign exchange, creates employment opportunities and enhances the country's economic growth.

Bangladesh is considered to be one of the most suitable zone for fisheries in the world, with the largest flooded wetland in the world and the third highest marine biodiversity among Asian Countries according to a report of Food and Agriculture Organization (FAO). Availability of cheap labor, resources and growing demand has made fishery as one of the profitable sector for business.

Fisheries Sector:

Fisheries the occupation or industry of catching fish or tapping other marine or freshwater resources. One of the major sectors of Bangladesh agriculture is represented by the fisheries sector. Being a deltaic land with numerous rivers and inland haors and beels (lakes and lowland areas of considerable size), and also ponds that are dug in populated

areas for the purpose of bathing, washing and often as a source of rinking water, fish became an integral part of the food culture. In the past hardly any need was felt for fisheries education and research, because population was low and fish in plenty. Fisheries now play a major role in nutrition, employment and foreign exchange earnings.
